technologies

INTILED
LINE ANTIGLARE

Truelight™

A comprehensive system of solutions and approaches that enables flawless lighting effects regardless of the light colour, optic type, or fixture design.

COOLight™

A comprehensive thermal management solution for INTILED lighting fixtures.

Aquatech™

The multi-stage water protection technology used in all INTILED fixtures with IP66 to IP68 ratings.

EternalTechnology®

The continuous internal temperature monitoring technology of the lighting fixture.

Available custom versions (see page 12)

100%

version

INTILED
LINE ANTIGLARE

Tropical

Is a special version of INTILED luminaires designed for use in hot climate regions. This version ensures stable operation at elevated ambient temperatures (up to +55 °C) as well as high humidity levels (up to 100%).

Arctic

Is a special version of INTILED luminaires designed for use in the Far North regions. This version ensures stable operation at low ambient temperatures (down to -55 °C). The Arctic version also features a soft-start system and a glass heating system.

Marine

Marine version is a special version of INTILED luminaires designed for use on bridges and other facilities in coastal areas. This version provides additional protection against high humidity (up to 100%), as well as enhanced sealing of internal components to improve the luminaire's resistance to vibration. The marine version may also include a mounting system with increased protection against vibration loads.

INTILED

Light. Done right.
